EXECUTIVE SUMMARY

AI and data product leader launching and scaling **0-to-1** platforms across enterprise and regulated environments. Combines **customer discovery**, **product strategy**, data architecture, **ML evaluation**, **responsible AI**, **developer experience**, **product analytics** and **platform economics** to build trusted products with measurable adoption and revenue impact. Brings **0-to-1** product discovery, **GenAI/RAG**, **agentic workflows**, **ML evaluation**, **MLOps**, **responsible AI**, **data platforms** and **product-led growth** from **roadmap** through scale.

EDUCATION

University of Michigan, Stephen M. Ross School of Business - MBA, Strategy, Technology & Operations | 2022 - 2024

London School of Economics and Political Science - Executive Coursework, Economics, Markets & Public Policy | 2024

Indian Institute of Technology - B.Tech, Computer Science & Engineering | 2010 - 2014 | Peer-reviewed ML research, 159 citations

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) - Generative AI

2024 - Present | San Francisco, CA

Director, AI & Data Platform Product Management

- Owned **product strategy** for a **Zero-ETL** customer **data platform**, including **Golden Record** identity across **15+** first-party sources, schema contracts in CI and lineage tracking; consolidated **40+** sources and cut data latency **26** hours to **<15** minutes at four-nines reliability.
- Launched an **AI/ML** lead-scoring product using behavioral feature engineering, champion/challenger evaluation, PSI drift monitoring and auto-retraining; generated **+\$25M** incremental Q4 revenue, reduced CAC **20%** and increased conversion **1.8% to 5.4%**.
- Owned **roadmap** for an **agentic GenAI** shopping assistant, hardening **RAG** with evals, **human-in-the-loop** controls and trust-and-safety guardrails; drove **25%** adoption, brand favorability **55% to 70%**, hallucinations to **2.8%** and session depth **+15%**.
- Authored the PR-FAQ and **\$100M+** GMV model that secured **\$5M** for the **roadmap**; led an **\$85M** buy-vs-build / acquisition evaluation and post-deal consolidation that improved gross margin **55% to 81%**.
- Shipped Japan localization using tokenization and honorific handling as a reusable internationalization template for future markets.
- Directed a managed agent **platform** connecting foundation models to private enterprise data and business systems, defining access controls, auditable action traces, retention limits, human approvals and cost-quality routing for production workflows.

Rakuten Group, Inc.

2023 | Tokyo, Japan

Senior Product Manager, GenAI & Merchant Platform - MBA Internship

- Built a horizontal **GenAI platform** across **70+** business units and **50,000+** merchants on a buy-intelligence, build-context thesis, integrating an external foundation model behind PII redaction and hybrid vector + keyword retrieval over a unified knowledge graph.
- Delivered **+15%** merchant conversion, cut listing time **45 to 12** minutes, reached **40%** adoption in six months and reduced network energy use **25%** through inference optimization and caching.
- Specified **platform** requirements for PII protection, hybrid vector + keyword retrieval and a unified knowledge graph, creating reusable search, generation and merchant-operations primitives across a multi-tenant enterprise AI **platform**.
- Optimized inference efficiency, caching and workload management for the merchant AI **platform**, reducing network energy use **25%** while improving the product economics and scalability of high-volume **GenAI** workflows.

Microsoft Corporation - Azure

2020 - 2022 | Redmond, WA

Senior Product Manager, Cloud Data & Lifecycle Intelligence

- Used **product-led growth** loops and lifecycle telemetry to increase activation **262%**, NRR **102% to 128%**, reduce churn **14% to 6.5%** and improve win-back **4% to 22%**.
- Owned a compliant data-sovereignty product across **10** markets with regional sharding, in-country key management and policy-as-code guardrails; rescued a **\$5M** contract, won a **\$2M** upsell and averted **\$25M** in regulatory fine exposure.
- Partnered with data science on retention and propensity models, using RICE and time-to-first-value to prioritize onboarding, lifecycle interventions and expansion opportunities.
- Productized verified identity, approvals and event-triggered workflow automation, reducing contract-to-cash from **14** days to **<48** hours and turning compliance-heavy transaction steps into configurable product capabilities.
- Extended the **roadmap** with retention and propensity models that converted lifecycle telemetry into product interventions and expansion forecasts, strengthening **ML-driven** personalization, customer-health scoring and **product-led growth** decisioning.

The D. E. Shaw Group - Real-Time Risk

2016 - 2020 | New York, NY & Hyderabad, India

Vice President, Data & Intelligent Automation Product

- Built the **15+** engineer organization behind a real-time risk **data platform** using Rust, Kafka and Flink; cut latency **90ms to 4.2ms**, false positives **15% to 1.8%** and unlocked **\$85M** in regulatory capital.
- Launched an intelligent document-processing **platform** with semantic extraction and confidence-scored human review; achieved a **98%** auto-pass threshold, cut earnings ingestion from hours to seconds at **~70%** lower cost and fed corrections into active learning.
- Built a unified deal-data repository in a **72-hour** sprint, reducing consolidation **48 to 6** hours and helping close a **\$25M** Series B one week ahead of competitors.
- Executed a Strangler-Fig **platform** migration with traffic mirroring, a **90-day** shadow-mode validation and drift testing before cutover; scaled the real-time decisioning **platform** to **5.4M** messages/sec with zero dropped packets through live market stress while preserving explainability and production reliability.

McKinsey & Company

2014 - 2016 | London, UK

Product Strategy Associate - Digital, Analytics & FinTech

- Drove **0-to-1** product launch of a Southeast Asian neobank using **400+** alternative-data **ML** features, a regulatory sandbox and eKYC/liveness detection; scaled to **100K** active users in **90** days with approval **10% to 40%**, **2.4%** NPL and CAC **<\$10**.
- Introduced Agile Pod delivery and hindcasting-based validation at a national retailer, cutting analytics speed-to-market **6** weeks to **<1** week while improving stakeholder adoption through transparent model review.
- Led a next-best-action product that translated predictive churn scores into understandable reasons and recommended advisor actions; added feedback and rejection mechanisms that preserved human judgment and generated new training signals.
